👤 PROFILE

Hello! I am a full stack developer with a strong background in both front-end and back-end technologies, as well as mobile application development. I have experience working with languages such as JavaScript, HTML, CSS, Python, and Java, as well as frameworks like React, Angular, Node.js, and Django. In addition, I have extensive experience developing **Flutter** and **React Native** mobile applications, allowing me to build cross-platform mobile apps with seamless performance and intuitive user interfaces.

My skills in developing responsive and user-friendly websites, as well as creating robust and scalable server-side applications, make me a valuable asset to any company looking to enhance their online presence and functionality. I have a keen eye for design and a passion for creating intuitive and efficient user experiences across both web and mobile platforms.

In addition to my development expertise, I am proficient in **Linux administration and computer networking**, giving me a deeper understanding of server environments, networking protocols, and security measures. This allows me to optimize server performance, handle deployments, and troubleshoot network issues effectively.

I am also skilled in **database management, API integration, and DevOps practices**, which enable me to deliver end-to-end solutions that meet both business and technical requirements. My proficiency in setting up **CI/CD pipelines** ensures faster development cycles, while my understanding of **version control systems like Git** ensures smooth collaboration.

Overall, my diverse skill set—including mobile app development with **Flutter** and **React Native**—and passion for delivering high-quality software solutions make me a valuable addition to any team. I am confident that my expertise in full stack development, mobile app creation, Linux, and networking can help your company achieve its goals and drive success in the digital space. Thank you for considering me for any upcoming opportunities.

🎓 EDUCATION

2023	MSc in computer science Rift Valley University
2021	BSc in Information Technology Woldia University

PROFESSIONAL EXPERIENCE

2022 – 2023

Esparento PLC

Full Stack Developer

I have successfully developed a variety of web applications that cater to different needs and industries. These applications have ranged from e-commerce platforms to project management tools, showcasing my versatility and ability to adapt to different requirements.

Through these projects, I have honed my skills in front-end and back-end development, as well as my proficiency in various programming languages and frameworks. I have also gained valuable experience in working with clients, understanding their needs, and delivering solutions that exceed their expectations.

Overall, my achievement in developing different web applications highlights my dedication to mastering my craft and my commitment to delivering high-quality results in every project I undertake.

2021 – 2022

Ethiopian Federal Police Commission

Software Developer

One of my achievements is developing a credit and saving web system using Oracle, Angular, and Express. This project involved creating a platform that allowed users to manage their credit and savings accounts effectively. I utilized Oracle database to store and manage the data, Angular for the frontend interface, and Express for the backend infrastructure. Through my work on this project, I was able to successfully design and implement a user-friendly and efficient system that helped individuals track and improve their financial health. This achievement showcases my technical skills in web development and database management, as well as my ability to deliver projects that meet the needs of users.

2023 – 2024

Ken Technologies, Inc

Full Stack Developer

I have been continuously honing my skills in developing various web applications. From the time I started until now, I have worked on numerous projects, each one adding to my experience and expertise in the field of web development. I have stayed up to date with the latest technologies and trends, ensuring that the websites I create are modern, functional, and user-friendly. My dedication to learning and growing in this field has allowed me to continually improve my craft, creating innovative and high-quality web applications that meet the needs of my clients and users.

06/2024 – present
Addis Ababa, Ethiopia

Fergami Technologies

Full Stack Developer

Since being hired, I have had the privilege of leading the development of Aura, a comprehensive Property Management System, as a Full Stack Developer. This enterprise solution revolutionizes property management by automating workflows and enhancing operational efficiency across all stakeholders. I architected and implemented the full-stack platform using React, Node.js, and PostgreSQL, designing core features including dynamic property registration, automated parking allocation, and digital lease processing. The system incorporates a robust financial management module supporting multi-channel payments and real-time transaction tracking, along with a maintenance ecosystem featuring role-based task assignment and tenant-initiated repair requests with photo documentation. I implemented secure communication channels with real-time messaging and automated notifications, while developing specialized modules for tenant portals, maintenance workflows, and QR-based security access. The technical impact includes an 80% reduction in manual processes through automation, implementation of JWT authentication and role-based access control, and optimization to handle thousands of concurrent users. This project has demonstrated my expertise in full-stack development and system architecture while delivering measurable business value through technology. I continue to enhance the platform with new features to meet evolving market needs.

01/2026 – Present
Ethiopia, Addis Ababa

Exceed IT Systems

Web Developer

Since joining the organization, I have been actively involved in the development of a Real-Time Fleet Management project as a web developer. In this role, I have gained extensive knowledge and hands-on experience working with real-time GPS data, including data processing, visualization, and system integration. Additionally, I have strengthened my understanding of web security practices, ensuring secure data transmission and protection against common vulnerabilities. Through this experience, I have also developed problem-solving skills related to performance optimization, scalability, and handling real-time data challenges in modern web applications.

SKILLS

- HTML/CSS
- Responsive design
- Browser developer tools
- Security best practices
- Database management (e.g. SQL, NoSQL)
- Linux
- CI/CD pipelines
- JavaScript
- UI/UX design
- Backend Development(Node js, Express js, and Django)
- Cloud services and deployment (e.g. AWS, Azure)
- Git, and GitHub
- Dart
- Frameworks (e.g. React, Angular, Vue)
- SASS/LESS
- API development(RESTful APIs, GraphQL APIs, and WebSocket APIs)
- Docker
- Computer Networking
- Flutter
